Q1 **Please choose the water service delivery model that you support**

Multi Choice

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I like the idea so the ratepayers can stay engaged and that there is more local control and accountability. I trust that this service will be run professionally by good people.

Q3 **Do you want to upload more information to support your submission? e.g. a written submission, photo, or illustration.**

Long Text

Council proven past performance.
More economic over long term
Already in peace & operational.
Stormwater: Clearance of stormwater needs modernising all those huge gutters in the roads! my soakaway is 35 years old and must be full as it overflows up the pipe.

Long Text

Mainly due to accountability.

Can I comment on a parallel issue.

I see via the Courier that Council provides water to 70% of the population here. That means 30% get it other ways. Where does that leave those outside the Council?

With the proposal to close water races, many are going to be left with no water for anything. Where do the new government requirement leave the council regarding them. A total infrastructure is needed. If races are closed. So do the figures given account for that. who pays the bill. (see attached)

Water Provision:

Is whatever is in place part of the part of the Council oversight?

New reticulation to replace races here will probably cost half a million, a major thing for us and we won't be alone with that.

What happens to the consents used for the water races. They need to be still used for the new system and given to other users.

I note that the consultation process underway seems to be stalled with issues even with the first intake looked at still not answered.

I hope we don't end up with no water or something that does not work or is not affordable as Council seems to have made its closure decision without a viable replacement already thought through.

Water provision to residents is Council's responsibility. That central government needing to pass new laws telling councils that is a sad day for all NZ.

Multi Choice

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Responsibility rests with one council employee – CEO

Council repeatedly tells rate payers that they are managing water well and planning to comply with all government regulations.

Council is already employing staff with experience + knowledge. Why lose it?

WSCCO is a misleading title - the Council's control is one step weaker than with SABU

Long Text

Don't decide to fix what is not broken. Always successful approach.

Don't want to restrict council borrowing because of low income.

CCO - doubling administration mechanisations is inefficient.

Directors always expect exorbitant compensation, usually without any responsibility for failing overall.

No direct control over the quality of contractors employed & carry out the major service works.

NZ had once, on electrical system that was recognized as great model, It was sold off, now a shambles.

Ratepayers can complain directly to Mayor when services are not being done correctly. Much harder with CCO not public servant!

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Ratepayers through Council have a say in how things should be run and services delivered. Have a separate organisation would be more expensive and would be more inefficient full stop.

Long Text

I agree with you proposal. However, I understand one reason the nation has reached this unenviable situation, where the government is forced to instruct us to take the actions necessary so clean and safe drinking water flows from council supplied taps, is because elected councillors have rather preferred to delay required capital expenditure in favor of keeping rates low, so deferring required maintenance of infrastructure. So if we do adopt your proposed solution, the monies must be ring fenced and not to be siphoned off to fund other unrelated projects.

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Local accountability for safe drinking water.
Revenue spent on water services only.
Water quality across the Ashburton District needs to be key focus of SABU. Nitrates needs to be below levels set by water services authority.

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

1. All water services must be retained by the council.
2. Charges for excess water usages.
3. All new homes should save rainwater for garden usage.
4. Lots of home have lots of people live in use more water than most.
5. I live in an ecofriendly St.

it is more beneficial to public that water management is continued by the council staff, administration as it is now. They know what they are dealing with already. Plus there should be minimal extra cost. To employ another board & administration group would be financially wasteful.

Q1 **Please choose the water service delivery model that you support**

Multi Choice

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I support this option as I feel the council do a good job with water overall. Anything that relates to government or Ecan is too unreliable at the moment and a new entity set up will probably be unreliable.

Water Services Council Controlled Organisation

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I firmly support the WSCCO option because I believe it represents the best path forward for the residents of Ashburton. Entrusting our water services to a professional board specifically dedicated to managing and overseeing water governance ensures that these critical resources are handled with the expertise and focus they deserve. Water is a vital resource, and its management requires specialised knowledge and a long-term vision that I feel our democratically elected council, despite their efforts, may no longer possess.
This lack of expertise is not a reflection of their commitment but rather an acknowledgment of the increasing complexity and technical demands of water governance. The challenges of maintaining sustainable water services, addressing infrastructure needs, and planning for future demands require a level of specialisation that goes beyond the scope of a general council's responsibilities.
This is precisely why the current government has introduced the LWDW initiative. It aims to address the growing concern that too many decisions, particularly those impacting essential services like water, are being made without adequate public consultation. By shifting governance to a dedicated board, we can ensure that decisions are made transparently, with the input of experts and stakeholders, and in the best interest of our community's future.

I have concern about the set up costs of the other water service delivery choice and also there will be less ratepayer input available.
We need to have good quality water at the best possible price.
I am very concerned though about the affordability for many ratepayers with the projected increases of water delivery and services. The suggestion of possible water delivery charges concerns me. Council needs to prioritize other expenses, good quality water is important.

Good morning/afternoon,
A few comments re the water reforms I realise water reform is now a legal requirement . In the councils brochure on or about the second page in there is a statement regarding consultation with ratepayers before major work is carried out. We live in Mt Somers and don't remember any public meeting or consultation re the new treatment plant up here,the first thing we new was when the machinery moved in. It is too late now but it seems to me to be a huge overkill for the number of connections and I think it opened somewhere in the vicinity of 25% over budget. Each connection could have been supplied with a Rolls Royce system for a fraction of the cost!I have said before that it seems ridiculous to me to have to pay for drinking quality water to bathe in wash clothes and dishes in. Under the fresh water heading in the brochure, the price was $720.00 whereas in the online presentation the price was $745.00. I am semi retired and finding the rates an ever increasing burden! I was looking forward to retiring completely but that is rapidly becoming a dream that is never going to be a reality! On the councils website I see in places it states that “we have lots more planned”, do councillors sit around the table and think “what can we spend money on next”. The council needs to think of everybody when setting rates and stick to the neccessities not the “nice to haves” I hope that our part of the second bridge is not going to have a cost over run like most of the recent projects ie the new admin building, and somebody oversees the project with regard to the time taken to do the job as the Mt Somers plant seemed to take an inordinate amount of time to complete.

Council controlled with professional leadership & restructure with capable people is the best model for Ashburton District.
Need a business model focused on our community's needs.
Ashburton is fortunate to have had in the past & now a forward thinking council, Governance & Management, to deliver drinking water, wastewater & stormwater services. They have kept up to date with resources resulting in our water services planned for the present & future.
Therefore the Stand-Alone Business Unit is the water service delivery we support.

Water Services Council Controlled Organisation

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

WSCCO option has advantages. A cross section of expertise outside of council selected/elected for their knowledge and skills related to water services will benefit the independent WSCCO.
WSCCO as a new entity will be established to respond to without parochial bias.
It will include wide representation to deliver water done well services while responding to freshwater quality/quantity requirements. This will include impacts of services related to climate and landuse change, for example, ground and surface water, aquatic and terrestrial biodiversity.

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

We are very concerned about council spending on water which increases rates considerably. Is the council following government instructions blindly, or does it think there is a genuine need for the changes coming? We are happy with the present delivery of water and think that the council should continue with it. The council is answerable to its ratepayers, not the government.

17 April 2025

Health New Zealand
Te Whatu Ora

Local Water Done Well
Ashburton District Council
2 Baring Square East
Ashburton

Tēnā koutou

Public health advice on Local Water Done Well

1. We are providing advice on the Ashburton District Council's proposal for Local Water Done Well. Health New Zealand – Te Whatu Ora has statutory obligations under the Pae Ora (Healthy Futures) Act 2022 and the Health Act 1956 to improve, promote and protect the health of people and communities. This advice has been prepared by the National Public Health Service (NPHS) Te Waipounamu of Health New Zealand – Te Whatu Ora. NPHS Te Waipounamu provides public health services to the Waitaha region including the Ashburton district.
2. NPHS Te Waipounamu does not have a view on the preferred option for the delivery of water services in the Ashburton district. We acknowledge that these plans are intended to encourage councils to examine how they can sustainably fund three waters infrastructure long into the future, including meeting regulatory requirements in terms of quantity and quality of water and supporting growth.
3. Ashburton District Council's proposal for Local Water Done Well may have significant implications for public health.

Advice

4. The following outlines our technical advice on Ashburton District Council's proposal for Local Water Done Well to protect communities from waterborne diseases, through the provision of drinking water supplies, sewerage and stormwater systems.
5. NPHS Te Waipounamu encourages Council to ensure that the maintenance and strengthening of three waters service delivery allows for population growth. We support the continued operation of the three waters infrastructure so that services are not reduced or withdrawn. The provision of safe and adequate supplies of drinking water and the collection, treatment and disposal of sewage and wastewater protects public health.

6. Safe drinking water is crucial to public health. The well-known outbreak of gastroenteritis in Havelock North in August 2016, which was caused by contaminated drinking water, resulted in an estimated 5,500 of the town's 14,000 residents becoming ill with

campylobacteriosis, and of these, 45 people required hospital treatment. It is possible that the outbreak contributed to three deaths, and an unknown number of residents developed long-term health complications.

7. The safe collection, treatment and disposal of sewage and wastewater also protects health. Human waste carries a wide range of pathogenic micro-organisms, and many are still viable and virulent, even if sewage has been in the environment for some time. Sewage and wastewater may also contain toxic chemicals, particularly from industrial and trade waste sources. NPHS Te Waipounamu supports Council's proposal to invest in water services to meet regulatory requirements which protect public health.
8. NPHS Te Waipounamu supports Council's proposal to invest in water services to meet regulatory requirements.
9. NPHS Te Waipounamu encourages Council to ensure that there is ongoing investment in the renewal and maintenance of infrastructure to maintain levels of service in the medium and long term.
10. NPHS Te Waipounamu notes Council's preferred delivery model appears cost-effective and will keep costs manageable for users. NPHS Te Waipounamu supports the need to keep costs manageable, whilst at the same time protecting people's health by ensuring access to safe drinking water, stormwater and wastewater disposal is affordable.
11. NPHS Te Waipounamu encourages Council to ensure adequate resources are allocated to higher risk communities, including those that are currently under-serviced or not serviced.
12. NPHS Te Waipounamu supports Council's consideration of intergenerational equity, and the impacts of climate change to ensure that this essential public health infrastructure is protected from extreme weather events.
13. NPHS Te Waipounamu encourages Council to ensure that there is equitable provision of adequate water supplies to meet health and sanitation requirements.
14. NPHS Te Waipounamu supports Council's acknowledgement of the importance of relationships with the regional council. These discissions should include the interaction between the stormwater and flood protection systems so that stormwater ingress to sewers is managed, and will reduce the risk of sewage overflows, but also that flood risk from stormwater ponding is not increased.
15. NPHS Te Waipounamu acknowledges Council's exploration of the potential efficiencies that could be achieved through an independently managed structure such as a Water Services Council Controlled Organisation.
16. While there is no specific requirement in the Local Government (Water Services Preliminary Arrangements) Act 2024 for iwi Māori to be consulted, NPHS Te Waipounamu encourages Council to work closely with mana whenua to ensure water services reflect cultural values, promote environmental sustainability and support their needs.

Conclusion

1. Thank you again for the opportunity to provide advice on Council's proposal for Local Water Done Well.
2. NPHS Te Waipounamu does not wish to be heard with respect to this technical advice.

Nāku iti noa, nā

Vince Barry
Regional Director
National Public Health Service
Te Waipounamu

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I fully support the Stand-Alone Business Unit. It is important elected Councillors are directly involved in major decisions of financial spending, and the area where major development is undertaken. Infrastructure that has been built in the past for the three waters, has meant the Ashburton District Council will be able to comply with the new Government legislation by continuing to implement the strategy already outlined in the Long-Term Plan.
However, the Stand-Alone Business Unit must be financially independent of other Council finances. It must be a truly user pays Business Unit, no cross subsidization from other ratepayers in the district. It will be inevitable water meters will be needed sooner than later, so those who use more water pay accordingly.
Another low nitrate well is needed on the south side of the Ashburton River, the present well in the Tinwald reserve is marginally acceptable for nitrate levels for potable water. With the increased demand in the future from Tinwald and Lake Hood, it is foolhardy to rely on supply from pipes across the river.
A Water Services Council Controlled Organisation as the council report outlined, would cost ratepayers considerably more than the Stand-Alone Business Unit.
Having a completely separate group of Directors, an expensive CEO, all the infrastructure such as administration staff, separate vehicles, and obliged to make sure the end of year report finished in credit.
With a CCO Organisation taking a large part of present administration costs away from council, it would make recouping overheads in the council building difficult.
Really congratulation Councillors, I support your first proposal of a Stand-Alone Business Unit.

Long Text

Firstly we, as ratepayers, have paid for years for these assets and I feel that the ADC has managed/renewed these resources well, especially compared to many other areas of NZ, where reinvestment has been sadly lacking. I would not be comfortable with handing over the assets which the past councils have adequately run to others, or be under the control of outsiders. I have also read the brochure that the ADC put out, and it stacks up economically to be a stand-alone business unit. We need to be autonomous and make decisions for our community, not be dictated to by those outside of our community or region. If it ain't broke, don't fix it! (An old saying) I feel that the ADC have the skills and vision to continue to invest in adequate water reticulation etc.

The staff structure is already in place and has the necessary experience to deliver.
Consideration should be given to long term reductions in wastage of treated water for non-potable use eg garden irrigation/washwater etc.
Appropriate charging for trade waste disposal may warrant review eg volumetric and qualitative monitoring of wastewater parameters reflecting the ability of the infrastructure to treat these wastes.

Long Text

I don't like the idea of a separate organisation which would noy be big enough to justify the costs of employing professional managers and administrators. There would be less accountability to the community. Better to keep water services within Council control.

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

We have spent a lot of money on infrastructure over the years so it would be better to have the council controlling the water.

Multi Choice

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

My concern is every one is clipping the ticket and increasing the cost of everything, for pensioners it's becoming an epidemic of greed.
Even the rates rebate is unobtainable.
I am not an expert on very much these days so one goes for what looks like the best option.
Just don't get greedy that's all we ask.

This is why we pay rates! It is the primary reason why a local Council exists.
Water and road infrastructure.
I do not want it seen as becoming a 'for profit' organisation in any way but user pays agreements with farmers and industry may be necessary.
Electricity is a prime example of why we don't want any kind of privatisation.

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

A separate entity from the council could generate division and skewed projection costs over the next decade/s. Keeping the essential services within the ratepayer sphere of influence seems a better option.

Long Text

Keeping the services within the existing Council should keep the costs down. A separate entity has to have separate staff, which costs more. Every organisation in central and local government should be trying to minimise costs and extra expenditure wherever possible. You already have Council staff doing this work, so nothing should really change.

Long Text

Ashburton counsel

Thanks for the opportunity to have a say in this matter.
It was with great disappointment that I have read through this new water proposal.
I mistakenly has thought that 3 waters had been done away with, now I realize it has become law. Taumata arowai is essentially a Maori board with oversight on all NZ water. With a 25.3 million dollar budget that will be funded by the taxpayers.
The people of NZ can't afford to retire anymore because counsel rates are too high. Now this gets forced onto residents without having asked the citizens if they need or want this.
Therefore my suggestion:
All counsels through NZ should ask their ratepayers if they want Taumata oversight and pay for it, or are they content with the water services of their counsel.
If people don't want this new expense, government must do what they should have done in the first place and ask the people in a referendum what they want.
We are still a democracy and something as important as this must come to a vote. What will be next, our property rights □□

Thanks for your time and I hope for the sake of all people in NZ that we will move in the right direction.

I fully support your decision of opting for a Stand Alone Business unit.
Water is a vital ressource that needs to stay in the hands of our community.
For so many families life is already a struggle financially, sharing the cost through our taxes I feel is an important part of being a supportive community.
I think Ashburton district Council have done a fantastic job looking after the delivery and maintenance of our water system and I fully trust they will do a great job going forward.

Long Text

Keep it in house to better control outcomes required for the community & district , also better for rate payers as council control costs going forward.

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I only support this option because it retains most of the control locally. The downside is that with a SAB it will adds another layer of costs in the form of payment to outside directors etc. I absolutely do not support adding fluoride to our water!!!

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Council won't have all the control when it comes to repairs and much needed upgrades in the network.
As a stand- alone business, whoever is in charge will be able to make the call on whether the job needs to be done more for the interest of the client rather than the amount of votes one gets during election. They will be able to weigh in the necessary risks to spend a big amount for repairs now instead of a quick fix that will end up costing heaps more down the line.

I want people who understand our district to solve our water issues. Not 'experts' brought in that have grandiose ideas for our important infrastructure. Out District that requires potable water is growing – XX - all the new subdivisions underway. All should be reticulated and have water metres. I believe ALL residential areas should have a reticulated water supplying. That includes NE Ashburton. We cannot wait any longer. You have seen my water test results!!! They are dire. Please put metres on all households soon as water is a precious resource not to be wasted. Good luck. Lal Mulligan PS Great news for Keenans Rd. residents in today's Guardian.

ADC has spent considerable money on the wastewater system to bring it up to a very high standard. This should be managed by the ADC, not a committee or board of directors, who will be likely made-up of accountants etc. who are just money men and will make services much more expensive in the future.

Water Services Council Controlled Organisation

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Council management have done a solid job with the resources they have to deliver water services to date. This is in spite of, not because of, the council governance. An independent and competent board would enable water services to be truly ready for the challenges ahead. Council is too close to make this decision as egos dictate that they believe it is about them, when it's not, it's about what is right to deliver the service.
Multi-council CCOs are the only way forward and this council wouldn't even contemplate the idea - says it all!

Q1 **Please choose the water service delivery model that you support**

Multi Choice

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Retain control by the council by implementing a SABU. There is to much cost and lack of true control by establishing a WSCCO. Too many extra executives who will want to do things their way that we as ratepayers do not vote on or have any control over. Keep control and transparency within the council where we can have a say.

Q1 **Please choose the water service delivery model that you support**

Multi Choice

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

"but ruled out a single-CCO model involving a shared
arrangement with EA Networks in March 2025, instead
emphasising the need to retain strong control and oversight" this, alongside financial projections, and the fact that an essentially private organization would set the water rates if we proceed with WSCCO, has convinced me we must stay with existing SABU. Privatization has no place for essential services. I am satisfied with council approach to date.

Q1 **Please choose the water service delivery model that you support**

Multi Choice

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I wish to see the Council retain total control of water services as elected representatives of the community. It would be against community interest to have another level of expensive bureaucracy, which if human nature runs true to form, may have a discreet and slightly different agenda to that proposed by or to the ADC.

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Our thinking is 'Council know what they are doing' and 'Stand Alone Business Unit' is best.
Re General matters - we have great confidence in terms of our council staff.
We are well served overall.
One concern is vision at stop signs due to e.g. trees/vehicles parked too close to corners in our town.
please contact if further comment required. Keep up fine work and service.

Because we have already been upgrading infrastructure and as ratepayers have paid for it.
Always been locally monitored and locally upkeeped.
We do not need to have carryover debt from other areas where they have not Invested in upkeep of their infrastructure.
No need to mess with what Works., has always worked and will always work as long as we keep it in house and Ashburton looks after Ashburton.

No need for outside input. We have had this. We have got this. We know our water.

PS. When have ring in regard to leaks found whilst walking dog they have been fixed promptly. If not in house will this be the case?

Long Text

I like the propsed option because there is more accountability.

I wanted to comment on drinking water in Ashburton, the water here seems very hard, we have problems with scale build on appliances and in pipes causing damage, a filtration system that reduces hardness would be nice.

I also wanted to comment on the storm water in tinwald. It would be great if all the open drains could be converted to underground with grass berms added along paths to reduce run off (We get alot of surface flooding anytime it rains)

I wouldn't mind increases for water rates if these issues were addressed.

Q1 **Please choose the water service delivery model that you support**

Multi Choice

Stand-Alone Business Unit (Our proposal)

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

Important the place we pay our rates to is still in full control.

If not happy, we can vote Them out next term.

Low running cost in SABU option.

Long Text

As long as infrastructure stays in local hands is directly controlable by locals for locals. That local input is available to decide important issues, public to be consulted on any changes and additions of chemicals i.e. fluoride to the water, and be rejected if public votes against its introduction.

Long Text

A Water Services Council controlled organisation could be expected to make decisions based only on a business case. This could adversely affect residents on a low to medium income as they would not be eligible for rates relief.

Long Text

Council should retain control of all water activities in its district and be the ones making decisions on spending their rate payers money. I think attention needs to be paid to the difference between infrastructure costs and volume charges and ensuring that money is going back to ADC and being ring fenced for water.

My concern is there is a separate volume charge being touted either through ECan or Central Government directive - where will this money go and what will it be used for?

ADC council needs to maintain its integrity and transparency on handling rate payers money.

Long Text

There appears insufficient information to form a constructive view. There appears no model adjustment to account for a predicted and obvious decline in the value and purchasing power of the fiat $NZ, or perhaps the potential demise of the fiat $NZ and its replacement with digital fiat currency possessing literally no worth, as aspired to by the NZ Reserve Bank. Invalid crystal ball gazing with modelled projection for 20 years or more appears little more than preposterous, over-paid hand waving. Suggesting that 'debt' is a useful tool appears to exemplify the ingrained wrong think now permeating most institutions is a route to the continuation of the escalating deb facing this country and the dreadful consequences it will impose. There is nothing intelligent and "fair" arguing that a mechanism to place debt burdens on future generations is a smart move, creative fiscal or social investment.
There appears no allowance for population growth and the increasing crippling civic assault of rising rates, together with the consequences of unseen Council policies predicated on the unvoted for diktat from unelected/unelectable UNEP/WEF centric entities with their UN Urban Agenda Habitat 3 policies and the 2030 UNsustainable agenda, both of which are profoundly and intentionally toxic toward individual liberty and freedom of movement, and lead us all (perhaps with the exception of those rigging the ideology in play) toward destitution and de-industrialisation, the latter as evidenced by the assault on the agricultural sector that will eventually destroy the regional economy. The effect of these policies is not represented in the modelling scenarios, nor is it desired by the populace.
There seems little information that may be construed as helpful, other than what appears evidently planned, namely that we the rate payers will be required to provide for another escalating unpayable bill and consequently, dwelling in ever increasing destitution?

Long Text

The cost to establish and governance cost associated with another ACL doesn't seem feasible.

Also if ACL where a private company they would be more profitable, leaner and more efficient as complacency has set in by allowing a CEO to site at the helm for so long.

For that reason I feel the SABU route needs to be explored.

Also the SABU option allows for greater borrowing levels, which will allow works to be completed at scale, which shoukd be cheaper.

Long Text

I prefer that the Council retains close control of water services. There is a risk that an alternative structure may result in decisions being made that are not necessarily in the best interests of the ratepayers. Although clearly a different model, I would not want to see a situation similar to what happened when the Electricity sector was split up - this can lead to a focus on profit over the needs of the customers.

Long Text

Council will have better control and transparency for raye payer on where money is spent and wasted which we don't currently get from ACL that has become increasingly complacent over his 18 year tenure. This is something to look at going forward and having set terms for CEOs to gage change and more innovation. Acl may have contributed financially over the years, but that contribution could have been greater through better managment, leadership and attention to market trends

Water Services Council Controlled Organisation

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

This council has a proven record of a complete lack ability to do any regarding water.
When a conservation order was placed on the Rangitata river, many extraction applications have been approved.
Consent given under the guise of a similarly used Australian model for the failed Murray Darling Basin Plan known as "flood plain harvesting" which is nothing more than a cash grab.
Never-ending examples of ignoring water quality in wells, contamination of waterways and of recent times ground work causing contamination of water with effluent and as of last week the failure to inform community of toxic algae blooms. How can such a unity be trusted to do right by the community going forward?

Long Text

I would like to keep this in council. If delivered by outside organisation even though controlled by council less control over water rates. Council currently doing great job with water services

Don't know/Other

Q2 **Please explain why you support this option and comment on anything else you think is important.**

Long Text

I'm really keen for people to be encouraged--or at least given the option--to have tank water, particularly on larger sections such as the new builds at Mt Somers and other life-style blocks around Ashburton. We're always hearing that there's a water shortage and we need to be careful, but in reality, there's only a storage shortage. Plenty of water falls from the sky on a very regular basis and runs off our rooves and into the storm water drains or soil.

I prefer SABU because it gives certainty of pricing and supply. WSCCO has the potential to become a money spinner at the expense of Ashburton ratepayers and with that comes the risk of ever increasing water rates, at least in the short to medium term. This is not a new strategy, it's become prevalent in many places overseas, and to my knowledge, it has generally been to the advantage of the few at the expense of the many.

Happy with Council operating current system. Would prefer to keep it in house as Council retains control of it. Slightly cheaper. Council is keeping system maintained.
